\* The difference between the Current Use Alternative and the Proposed Action

1 - Proposed Action maintains current habitat

2 - Proposed Action reduces traffic impacts on Brandegee Wild Buck Wheat by an estimated 49 acres

3 - Proposed Action increases undisturbed potential habitat for Cloche Ancylicid by an estimated 9 acres

4 - Proposed Action increases potential common hog nosed skunk habitat in Garden Park ACEC by an estimated 80 acres

5 - Proposed Action improves Golden Blazing Star habitat by 20 acres
